## Microneedling

Microneedling treats the appearance of fine lines, acne scars and improvement of the skin's overall appearance. During this procedure, tiny needles are used to create controlled micro-injuries to the skin which produce collagen and elastin. The skin's natural repair process improves the surface of the skin and softens wrinkles for a youthful appearance and rejuvenated skin.

**SINGLE TREATMENT | \$325**

**SERIES OF 3 | \$825**

## Dermaplaning

Dermaplaning, similar to microdermabrasion, is an excellent and safe procedure for exfoliating the epidermis and ridding the skin of dead cells and fine vellus hair. Removing this layer allows products, such as superficial peels and serums, to penetrate more readily into the deeper layers, improving the product's effectiveness and increasing the likelihood of a good result.
